DAHYET AL AMIR

RASHED PROJECT

INTRODUCTION

Taj Al-Safa Housing and Real Estate Company's residential project is situated in the Prince Rashid area at a Significant location. The building has a distinctive exterior design and contains a group of luxurious apartments with neo-classic designs that provide the highest standards of comfort, health, safety, and well-being.

A Jordanian company specializing in the construction of residential buildings and the provision of apartments to provide comfort for residents and meet their needs.

PROJECT SPECIFICATION

The Astra stone is utilized in the project; it has great strength, a thickness of 5.2 cm, a degree of water absorption of 0.01, and has been assessed for its capacity to prevent water and moisture absorption by the Royal Scientific Society.

PARKING DESIGN

CEILING DETAILS

Car Parking Features

1. Each flat has one allocated parking space.
2. Customized Smart Lighting scenario & Energy Saving.
3. Electric car chargers for each flat.
4. Auto air compressor in parking.
5. Fire fighting System.
6. Security system
7. High water pressure (for car washing).

DAHYET ALAMIR RASHED PARKING

LANDSCAPE

PROJECT SPECIFICATION

In this project, external wall insulation is used; it is a composite cladding system of appropriate insulation and waterproof coating; it is an essential building energy-saving technology that prevents heat gain/loss through the building envelope.

DOUBLE GLAZED WINDOWS

Double-glazed windows are installed in this project they are constructed of two panes of glass filled with argon gas layer and then sealed. They are intended to provide an even more substantial barrier against external temperatures. By reducing conduction, the two layers of glass separated by a gap act as insulation.

ALUMINUM WINDOW FRAME

The project included the installation of specially designed aluminum frames that differed from the rest of the aluminum sections by having the following characteristic features:

The thickness of the Aluminum is 1.7 mm.

Italian LAVAL Window lock

Double Zipper Stainless Wheel Fiber glass window screen.

6 mm clear glass+ void 20 mm + clear double silicone.

AGC- Obeikan glass.

WINDOW SHUTTERS

- Calm motor, 30 and 40 Newton, with a warranty of 15 years, replacement.
- Use of acid-free silicone.
- All silicone works are to the highest specifications in the application (waterproofing + special silicone blade).
- Higher density sedra foam which gives it a higher insulation value and more durability
- Reinforcing the throat floor for large sizes greater than 4 m² with suede or beech wood.
- The glass is perforated and contains silica gel granules to absorb moisture.
- The column of the shutter is Aluminum, about 6 cm thick, with an aluminum thickness of 0.5 mm.
